

Never before have i been able to obtain vital traffic and weather information with such accuracy and timeliness. The FCC should have no rieg्न over the XM radio waves content. it is not their jurisdiction to mandate my listening likes or dislikes. I pay for the XM radio service and feel very strongly that my civil rights would be violated if the FCC was to step in as the "big brother" and tell me what I listen too and which source I choose to use is not to their liking and they are going to mandate change. The passing of the Petition 04-160 would be a lose-lose situation.

Please lobby to reject the petitions over reaching boundries.

THIS IS MY COUNTRY TOO!!
